

# NETACEA

One agentless integration.  
Three powerful capabilities.  
More bots stopped.

Defend websites, APIs and mobile apps from evasive automated attacks with a lightweight platform that is purpose built to perform at scale.

## Single integration

Natively plugs into technologies you already use, including all major CDNs, WAFs and load balancers. One deployment delivers protection from day one.

## Fails open

Maintain business continuity. Introduces no dependencies on site reliability. Ensures failures never block legitimate traffic.

## Multilayer detection

Combined patented machine learning models, past attack data and threat intelligence to deliver trusted protection across every endpoint.

## Frictionless for customers

Ultra-low latency. Block bots, not humans with an industry-low 0.001% false positive rate.

## High throughput, scalable

Analyzes billions of signals per second. Ensures the busiest and most complex attack surfaces are reliably secured in real time.

## SOC2 Type II compliant

Enterprise certifications ensure the highest levels of compliance standards and data security.

## Why enterprise businesses trust Netacea

**33x**

more bots blocked than competitors

**36 billion**

signals analyzed daily

**0.001%**

false positive rate

# Enhancing web security for the world's most attacked brands

OFFSPRING

✓ **£1 million** saved by reducing support calls for UK's largest telco

✓ **84%** reduction in web requests after removing bots for \$100bn+ US retailer

✓ **£1.4 million** in monthly fraud savings for Europe's biggest grocery loyalty scheme

## Why Customers Choose Us

### Agentless, self-managing

Protect websites, APIs and apps with a single, dynamically updated, edge integration that is invisible to attackers.

### Trusted defensive AI

Block bots, not humans. Highly accurate hands-free detection automatically blocks more bots than traditional solutions.

### Specialist bot intelligence

Visualize live incidents in real time, understand business impact and get forewarning of the planned attacks.

## Full protection from bots

Combine protection against ever-evolving automated threats across web, mobile and APIs with a single integration.
